**Condonation** (kɒndɒn-ə-tʃən). [ad. L. *condonā-tion-em*, n. of action f. *condonāre* to CONDONE.] The English use was taken from the Latin casuists of the 16-17th c.: cf. the later verb CONDONE.

The pardoning or remission of an offence or fault; the voluntary overlooking of an offence, and treatment of the offender as if it had not been committed; now (under influence of the legal use in b.) most frequently used of action towards the offender which tacitly implies that his offence is passed over.

1645 *BP. MOUNTAGU App. Caesar* vi. 169 The blot... of sin... remaining in the soul of man, in like manner as it did before condonation. c 1650 *JACKSON Creed* iv. ii. vii. Wks. III. 342 To hold that... God's favour or condonation (to use their Latin word with addition of one English letter) is... requisite for our acceptance or approbation with Him. 1871 *MORLEY Voltaire* (1886) 99 There ought to be little condonation of the foibles, and none at all of the moral obliquities, of the dead. 1885 *E. GARRETT At Any Cost* xvii. 296 Mrs. Brander's easy condonation of the sins of one who was 'so pleasant in society'.

b. *Law.* The action of a husband or wife in the forgiving, or acting so as to imply forgiveness, of matrimonial infidelity.

1788-91 *SIR W. SCOTT (LD. STOWELL) in Consistory Rep.* I. 130 Condonation is a conditional forgiveness which does not take away the right of complaint in case of a continuation of adultery. 1799 — in *Haggard Rep.* I. 793 Condonation is forgiveness legally releasing the injury: it may be express, or implied... It would be hard if condonation by implication was held a strict bar against the wife. 1858 *SIR C. CRESWELL in Times* 15 Dec. 876 Condonation meant a blotting-out of the offence imputed, so as to restore the offending party to the position which she occupied before the offence was committed. The English word 'forgiveness' VOL. II.

as commonly used, did not fully express the meaning of 'condonation'. 1859 *PHILLIMORE in Swabey Rep.* I. 348 The word and doctrine of condonation was introduced into the law of England from the Canon Law. The expression 'Condonatio' does not even occur in the Civil Law.

2. A number of states (or formerly of persons) united by a league; a body of states united for certain common purposes.

In modern political use, 'confederation' is usually limited to a permanent union of sovereign states for common action in relation to externals. Such were the following: *Germanic Confederation*, the union of the German States under the presidency of the Emperor of Austria from 1815 to 1866. *Confederation of the Rhine*, the union of certain German States under the protection of Napoleon Bonaparte from 1806 to 1813. *New England Confederation*, the union of four New England colonies for common defence against the Dutch and the Indians, 1643-84. The United States of America are commonly described as a *Confederation* (or confederacy) from 1777 to 1789; but from 1789, their closer union has been considered a 'federation' or federal republic.

5. *Ecll.* A rite administered to baptized persons in various Christian Churches; formerly called 'bishops'.

In the Roman and Greek Churches, always reckoned one of the seven sacraments, and in these and in the Church of England held to convey or be the vehicle of special grace which 'confirms' or strengthens the recipient for the practice of the Christian faith.

Down to the 13th c. confirmation was administered immediately or soon after baptism (as still in the Greek Church); since that time, it has been usually deferred in the Western Churches till the 'years of discretion'. In the Church of England and some other Reformed Churches, candidates are required publicly and personally to renew, ratify, and 'confirm' their baptismal vows (see CONFIRM v. 2, quot. 1552), and are then admitted to the full privileges of the Church.

**Confuse** (kɒnfʃuːz), *v.* [A passive pple. *confused* is found from 14th c.; but the present stem and active voice are only of modern use, having been formerly expressed by CONFOUND: cf. F. *confondre*, *confus*, L. *confundere*, *confusus*. The vb. is entered by Bailey (folio) 1730-6, and thence by Johnson, but there are no examples, exc. of the pa. pple., in J., Todd, or Richardson. The pple. was thus evidently an English adaptation of F. *confus* or L. *confusus*, with the native ppl. ending -ED, and the present stem a much later inference from it.

Hence, it may be said that *confound* had formerly 3 pa. pples., *confuse*, *confused*, *confounded*; the first two only passive, the last used also in forming the perfect active: of these *confuse* became at last solely an adjective; *confused* has given origin to a separate verb, *confuse*, of which it is now the pa. pple.; *confounded* remains the sole pa. pple. of *confound*.]

[The phonology and final stress in verse show this word to be of French origin. In all probability *cangun* in the earliest quot. is the same word, and stands for *cangun* or *cangun* (g for j being not infrequent in ME., cf. the form *kongon*), repr. an ONF. \**cangun*, *cangeon*: -late L. *cambio*, *cambionem* (cited in Grimm *Deut. Mythol.*, tr. Stallybrass 1888, vol. IV, 1754, and thence in Henschell's Du Cange), a CHANGELING (Ger. *wechselbalg* a child of an incubus, demon, or hag, substituted for a human child) f. *cambire* to change.

The ME. forms have suffered at the hands of bad copyists and editors, who have turned *conjon* into *conjon*, *conion* (= *conjon*) into *conion*, with other blundered spellings. A derivation from *cambio* fits the sense, for changelings were popularly held to grow up dwarfs or deformed in body (cf. sense 1), and deficient in intellect (sense 2), and to be called one was a grievous insult (senses 3, 4). The difficulties are (1) the apparent rarity of the word in Fr., where the only

instance yet cited is one of 1427 in Du Cange, repeated by Godefroy, under the form *changoon* 'terme injurieux', which is app. the central F. form, standing for *changoon*, *chanjon*; (2) the Afr. or early ME. change of *can-* to *con-*; this took place before the retraction of the stress from the final syllable, and may have been owing to association with the prefix *con-*.

To Kersey is due the statement (or suggestion) that the word was originally *congress* or F. *congrès*, subsequently treated as a plural, with singular *conger*. But it is to be noted that in most of the quotes. *conger* is applied to the association, not to a member of it. Bailey refers it tentatively to *conger* the fish, which may indicate a contemporary joke.

b. Acad. A general assembly of the members of  
 a University, or of such of them as possess certain  
 specified qualifications.

At Cambridge an assembly or meeting of the Senate. At  
 Oxford a meeting of the Vice-Chancellor, Proctors, and  
 'Regent Masters' (*Ancient House of Congregation*), to  
 grant or confer degrees, etc.; also, since 1854, the name of  
 the whole body of resident Masters, Doctors, and Profes-  
 sors (*Congregation of the University*), and of a regular  
 meeting of this body, constituting the chief deliberative  
 assembly of the University. (The intention of the Act of  
 1854 was to enlarge the constitution and powers of the  
 'Ancient House of Congregation': it was held however by  
 the legists that, instead of doing so, it had created a new  
 body, 'the Congregation of the University', leaving the  
 'Ancient House' intact. There are therefore now two  
 Congregations in the University.)

5. In English versions of the Bible, applied in  
 the O.T. to the collective body of the Israelites in the  
 wilderness, and to a public solemn assembly of the  
 people or nation: so *congregation of the Lord*, etc.

Here it is put for two distinct Heb. words קָהָל *qāhāl* and  
 קְהָלָה *qēhālāh*, the original difference between which was appa-  
 rently that קָהָל meant the collective body or community, and  
 קְהָלָה an actual assembly that had met and would disperse  
 again; but in application the two were necessarily often  
 identical; the assembly consisted of or represented the com-  
 munity. By the LXX קָהָל is, with rare exceptions, ren-  
 dered συναγωγή; קְהָלָה is rendered 70 times ἐκκλησία, 37  
 times συνέλευσις, 10 times by ὄχλος or other word. The  
 Vulgate has for both words a great variety of renderings,  
 e.g. multitudo, cætus, populus, turba, congregatio for both;  
 also plebs, vulgus, globus, caterva, synagoga for קָהָל;  
 concio, ecclesia, exercitus for קְהָלָה. Wyclif has *congrega-*  
*cioun* only in the few places in which *congregatio* appears  
 in the Vulgate; but in the 16th c. versions, *congregation*  
 became the predominant rendering of both words; in the  
 1611 version it occurs 124 times for קָהָל, 86 times for קְהָלָה.  
 (In a relatively small number of cases, both words are  
 rendered *company*, and *assembly*.) The Revised Version  
 of 1885 has distinguished קָהָל and קְהָלָה in the Septateuch  
 as *congregation* and *assembly*, but elsewhere has usually  
 continued the indiscriminate use of 'congregation' found  
 in the earlier version.

 gregacioun of the sones of Yrael. 1535 COVERDALE *Micah*

 Lorde [1885 assembly]. — 1 *Chron.* xxviii. 8 In the sight of  
 al Israel, the congregacioun of the Lorde [So 1885].

b. Hence, in O. T. language, in certain phrases,  
 e.g. the *congregation of saints*, of the *wicked*, of  
*evildoers*, of *hypocrites*, etc. = whole body, company.

6. Used by Tindale to translate ἐκκλησία in the

Representing L. *congruitas*, used by Aquinas in stating that while 'condignity' can be attributed to meritorious works only as they proceed from the grace of the Holy Spirit, it yet 'seems congruous' that a man, working according to his own virtue or power, should be recompensed by God according to the excellency of His virtue.' *Summa Theol.* Prim. Sec. Q. cxiv. Art. iii. Hence the expressions *meritum ex congruo*, *meritum congrui* 'merit (arising) out of congruity', 'merit of congruity'; *mereri (gratiam, etc.) de congruo* 'to merit (grace, etc.) from or of congruity'. (Some late writers have apparently confused the last with the 'congruity of efficient grace' in b.)

H. NEWMAN *Tract* xc. § 3 To deserve *de congruo* or of congruity, is to move the divine regard, not from any claim upon it, but from a certain fitness or suitability: as for instance it might be said that dry wood had a certain disposition of fitness towards heat which green wood had not. 1896 BR. H. BROWNE *On 39 Articles* Art. x, It being agreeable to His nature and goodness to bestow grace on those who make such [unassisted] efforts. Endeavours then on the part of man to attain to godliness were by the schoolmen said to deserve grace *de congruo, of congruity*.

b. (*Doctrine of Grace.*) The suitability or adaptation of divine grace to the character, nature, disposition, or other circumstances of the person called, to which some theologians attribute its efficacy (see CONGRUISM); 'the efficacy of grace which acts while at the same time preserving the action of the free will' (Littre). An inferior planet may be in inferior conjunction, i. e. between the earth and the sun, or in superior conjunction, i. e. on the farther side of the sun.

2. *Logic.* **Connotative term**: according to J. S. Mill, a term or word which, while it denotes (or is predicated of) a subject, also connotes or indicates its attributes.

In the scholastic and later logic a connotative, as distinguished from an absolute, term was one which primarily signified an attribute and secondarily a subject. In the logic of J. S. Mill this usage is inverted; the subject is 'denoted', the attribute 'connoted'. Later still, the terms 'denotation' and 'connotation' have been used in a sense synonymous with logical 'extension' and 'intension' (cf. quot. 1876 in **CONNOTATION** 2, and Fowler *Deduct. Logic* ii. (1887) 19).

1829 JAS. MILL *Hum. Mind* (1878) I. ix. 306 *Friend* is a concrete, connotative term... Its connotation is dropped by another mark, the syllable *-ship*; thus *friendship*. 1846 J. S. The Latin word was in common use in mediæval logic: app. first, according to Prantl, in Duns Scotus, and frequently in Occam, and so onwards in the terminology of the schools; thence it passed into English literary use; but its use as an English technical term of logic is recent, and due to JAS. and J. S. MILL.

4. *Logic.* (Of a term.) † a. With the earlier logicians: To imply or indicate the subject in which an attribute inheres, while primarily signifying or 'noting' the attribute itself. *Obs.* b. With J. S. Mill: To imply or indicate the attributes involved, while denoting (or being predicated of) the subject.

As to the change of use, see note to **Connotative term**, and cf. quot. 1829 with Heerebord above.

1829 JAS. MILL *Hum. Mind* (1878) I. i. § 5. 34 note, White, in the phrase white horse, denotes two things, the colour and the horse; but it denotes the colour primarily, the horse secondarily. We shall find it very convenient to say... that it notes the primary, connotes the secondary signification. 1646 J. S. MILL *Logic* I. ii. § 5 The word white, denotes all white things, as snow, paper, the foam of the sea, etc., and implies, or as it was termed by the schoolmen, *connotes*, the attribute of whiteness. *Ibid.*, The name... is said to signify the subjects directly, the attributes indirectly; it denotes the subjects, and implies, or involves, or indicates, or as we shall say henceforth, *connotes*, the attributes. It is a connotative name. *Ibid.*, Whenever the names given to objects convey any information, that is, whenever they have properly any meaning, the meaning resides not in what they denote, but in what they connote. 1887 FOWLER *Deduct. Logic* I. 19 A term may be said to denote or designate individuals, to connote or mean attributes or groups of attributes.

b. Hence, in general, non-technical use: To imply, include in its signification, convey to the mind or mean in actual use and application. (Often loosely used.)

Obs.* — App. only a Dictionary word, originating in an erroneous adaptation (after *nutritious*) of med.L. *connutritus*, rendering *συντρέφόμενος* having been nourished together, used by Hippocrates in conjunction with *ἐμφυτὸς* having been inborn, *congenitus*, congenital. (The regular meaning of *connutritious*, if in use, would be 'conjunctly nutritious': cf. the amended explanations of Craig and Smart.)

1656 BLOUNT *Glossogr.* *Connutritious* (*connutritus*), that hath the same nourishment, or bringing up. 1750-6 BAILEY (folio), *Connutritious* is that which becomes habitual to a Person from his particular Nourishment, or... had its first Aliments from sucking a distempered Nurse, etc. 1846 SMART *Supp.* *Connutritious*, nutritious by the force of habit. 1847 CRAIG, *Connutritious*, nourishing together.

**Conocuneus** (*kō'nokūnē's*). *Geom.* [f. L. *cōn-us* CONE + *cuneus* wedge.] A surface generated by a straight line which constantly intersects a fixed straight line at right angles, and also constantly passes through the circumference of a fixed circle; i. e. a figure with a circular base like a cone, but having instead of an apex a ridge or edge like a wedge.

First treated of by Prof. J. Wallis of Oxford in 1662. In his definition the name is applied to one quarter of the whole solid, formed by two sections, parallel and at right angles, respectively, to the edge, and having thus one fourth of the curved surface, and three plane surfaces, one a quadrant of the circular base.

Gr. *κωνος* cone + *δοντ*-tooth.] A small conical tooth-like glistening body, found in Silurian and other ancient strata, and at first supposed to be a tooth of a cyclostomous fish; now more generally considered to be the remains of some invertebrate animal.

1. One who gains possession of a country, etc., by force of arms; one who subdues or subjugates a nation; one who conquers or vanquishes an adversary, a victor. (Cf. the synonymous CONQUESTOR, CONQUEROR.)

*b.* Used as a distinctive surname or title of victorious princes; esp. in *Eng. Hist.* of William I, often referred to familiarly as 'the Conqueror'.

So far as English or Anglo-Fr. evidence goes, there appears no reason to think that as applied to William I, this term or its corresponding med.L. *conquestor*, *conquestor*, *conquistor* (see CONQUESTOR) meant anything else than 'conqueror' in sense 1, = *domitor* or *expugnator* *Anglorum*, *triumphator* *Anglia* of the contemporary chroniclers. The notion that *conquestor* had here only the sense of 'acquirer' or 'purchaser' as distinguished from 'inheritor' (see sense 2, and CONQUEST 5, in *Scotch Law*), appears to have been first started by Spelman (or his posthumous editors), whence it was taken by Blackstone and later writers. The historical evidence as to the use of the word shows that the appellation *Conqueror*, *Conquestor* was applied to William the Great, just as to Alexander the Great, to Charles the Great, to Jayme I of Arragon (*el Conquistador*), etc.

**Conquest** (kɒŋkwɛst), *sb.* Also 3-5 **conqueste**. [Represents two OF. words: (1) *conquest* (now *conquêt*) *m.*:—L. type \**conquestum* (cf. *Pr. conquest*, It. *conquistò*), med.L. *conquestum*, -*quistum*, for L. *conquistum*, neuter of *pa.* pple. of *conquirere* (see CONQUER); (2) OF. *conqueste* (now *conquête*) *fem.* = *Pr. conquesta*, Sp. *It.*, med.L. *conquesta*, -*quista*, *fem.* *sb.* from the *pa.* pple. (parallel to *sbs.* in -ata, -ade, -de). The latter of these expressed the action, the former the proceeds of acquiring or conquering. Cf. *acquest*, OF. *aqwest*, but *inquest*, *request*, OF. *enqueste*, *requeste*. *Conquêt*, *conquête* are still distinct in *F.*, but in *Eng.*, through loss of final -e and of grammatical gender, the two forms ran together at an early date.

The original sense in med.L. and *F.* was 'acquisition, esp. as the result of effort'; including getting by force of arms as well as by other means. Hence two lines of development: first, with the feudal jurists' personal acquisition of estate, as opposed to inheritance, without specific reference to the mode, whether by force of arms, by grant, or (in later times) by money, called *PURCHASE* in English Law; secondly, 'acquisition by force of arms, military conquest'. The latter of these is by far the earlier in English, and has always been (with its transferred uses) the only popular sense. The general sense of acquisition and esp. the legal sense as opposed to inheritance, is chiefly Scotch and prominent in Scotch law.]

[a. *F. conscience* (*conscience*) 12th c. (= *Pr. conciencia*, *consciencia*, *Sp. conciencia*, *It. coscienza*), ad. *L. conscientia* privity of knowledge (with another), knowledge within oneself, consciousness, conscience, f. *con-* + *sciens* to know; thus *conscire alii* to know along with another, to be privy with another to a matter, thence, *conscire sibi* to know with oneself only, to know within one's own mind.

In *ME.* *conscience* took the place of the earlier term *INWIT* in all its senses; cf. OHG. *gruotica*, Ger. *gewissen*, conscience. The word is etymologically, as its form shows, a noun of condition or function, like *science*, *prescience*, *intelligence*, *prudence*, etc., and as such originally had no plural: a man or a people had *more* or *less* conscience. But in sense 4 it came gradually to be thought of as an individual entity, a member or organ of the mental system, of which each man possessed one, and thus it took a *plural*. So *my conscience*, *your conscience*, was understood to mean no longer our respective shares or amounts of the common quality *conscience*, but to be two distinct individual consciences, mine and yours. Where the word has continued to be used without the article, as in 'the dictates of conscience', orig. parallel to 'the dictates of prudence' or 'of common sense', the prevalent tendency is to personify Conscience as 'this Deity in my bosom'. In the 15-16th c., the word appears to have been often, by reason of its final *s* sound, associated with plurals like *wisits*, *brains*, *bowels*, as *patience* is still in dialects. Cf. the illiterate spellings *consiens*, *conchons*, etc.: hence apparently *consciens* in *CONSCIENTIAL*, *CONSCIONED*, *CONSCIONLESS*.]

II. Consciousness of right and wrong; moral sense.

4. The internal acknowledgement or recognition of the moral quality of one's motives and actions; the sense of right and wrong as regards things for

which one is responsible; the faculty or principle which pronounces upon the moral quality of one's actions or motives, approving the right and condemning the wrong.

Opinions as to the nature, function, and authority of conscience are widely divergent, varying from the conception of the mere exercise of the ordinary judgement on moral questions, to that of an infallible guide of conduct, a sort of deity within us. Popularly, the word is often used for the whole moral nature; for its gradual individualizing and personification in this sense, see note in etymology.

4. *Nat. Philos.* Conservation of energy or force: the doctrine that 'the total energy of any body or system of bodies is a quantity which can neither be increased nor diminished by any mutual action of those bodies, though it may be transformed into any one of the forms of which energy is susceptible'; and that the universe is such a system, of which the total energy remains the same in amount, amid all the changing forms in which it may exhibit itself. So *conservation of mass*, etc.

App. the phrase originated with Leibnitz: see quot. *Conservatio virium vivarum*, in *Fr. conservatio des forces vives*, was in common use in the 18th c.: cf. *Vis viva*. In 1807 Young introduced the term *ENERGY*. In 1847, Helmholtz published a treatise *Über die Erhaltung der Kraft*; in 1853, Rankine defined 'conservation of energy' as a technical phrase. See *CORRELATION of forces*.

Observ.* No. 47. 338 The law of 'conservation of areas'. 1867 DENISON *Astron. without Math.* 203 This is called the law of conservation of areas; and it is only the same thing in other words as saying that the angular velocity in any given orbit varies inversely as the square of the distance.

1836-7 SIR W. HAMILTON *Metaph.* II. xxx. 206 Thus in the term Memory, the Conservative Faculty,—the phenomenon of Retention, is the central notion, with which, however, those of Reproduction and Representation are associated. 1879 THOMSON & TAIT *Nat. Phil.* I. i. § 271 A limited system of bodies is said to be *dynamically conservative* (or simply *conservative*), if the mutual forces between its parts always perform, or always consume, the same amount of work during any motion whatever, by which it can pass from one particular configuration to another. *Ibid.* I. i. § 346 A 'conservative disturbance of motion' is a disturbance in the motion or configuration of a conservative system, not altering the sum of the potential and kinetic energies.

2. The most common current designation of one of the two great English political parties, the characteristic principle of which is the maintenance of existing institutions political and ecclesiastical. (*With capital C.*)

The word was first used in this sense by J. Wilson Croker in an article published on 1 Jan. 1830; and almost immediately largely took the place of the term Tory (originally reproachful), which had been in use for nearly 150 years. (Measures tending to preserve cherished political conditions

had before this been sometimes spoken of as *conservatory*.) Preference for 'Conservative' sometimes implied disavowal of the reactionary tendencies which had sometimes been associated with earlier Toryism, and espousal of the new phase introduced by Sir R. Peel; and the name was not at first received with favour by all Tories, any more than it was admitted to be properly descriptive by their political opponents. Hence many early references ridicule the word.

1830 J. W. CROKER in *Q. Rev.* Jan. 276 Attached to what is called the Tory, and which might with more propriety be called the Conservative, party. 1832 *Blackw. Mag.* Jan. 115/2 The fortresses of the Conservative Party in the nomination boroughs are to be entirely destroyed! 1832 *Granville Mem. Cro. IV.* 14 June, Peel clearly does not intend that there shall be a Tory party, though of course there must be a Conservative party, the great force of which is the old Tory interest. 1844 DISRAELI *Coningsby* II. vi, 'A sound Conservative Government,' said Taper, musingly. 'I understand: Tory men and Whig measures.' 1845 — *Speech* 17 Mar., For me there remains this at least—the opportunity of expressing thus publicly my belief that a Conservative Government is an Organized Hypocrisy. 1872 — *Sp. at Manchester* 3 Apr., Gentlemen, the programme of the Conservative party is to maintain the Constitution of the country. 1874 GREEN *Short Hist.* Epil. 816 The Conservative Government encountered unexpected difficulties at home. 1884 *Pall Mall G.* 2 Aug. 1/1 Conservative and Liberal, as we ordinarily use the terms, are distinctions having reference to a particular practical struggle, the gradual substitution of government by the whole body of the people for government by privileged classes.

b. [from the *sb.*] Of, belonging to, characteristic of Conservatives, or the Conservative party.

1831 SIR R. PEEL in *Croker Papers* (1884) II. xvi. 117 There is another party... which... thinks the imposition of a Property Tax on Ireland and the aristocracy a Conservative measure. 1832 O'CONNELL *Sp.* 25 May, The learned Solicitor General for Ireland... admits that the details of the Bill are Conservative—that is the fashionable term, the new fangled phrase now used in polite Society to designate the Tory ascendancy. 1881 LADY HERBERT *Edith* 190 A great Conservative reaction had set in.

3. Extended to characterize a similar spirit in the political movements of other countries or times, in religious inquiry, criticism, business enterprise, etc.; the connotation being generally favourable.

1845 S. AUSTIN *Rankin's Hist. Ref.* III. 417 The one [party]... inclined to the absolute rejection of the traditional... the other, conservative even in matters of doctrine. 1875 JOWETT *Plato* (ed. 2) V. 181 Plato becomes more conservative as he grows older. 1876 FREEMAN *Norm. 4. The taking into account of anything as a motive or reason; a fact or circumstance taken, or to be taken, into account; a reason considered.

This sense ranges indefinitely between the process of considering and the fact or matter considered, without being quite identified with either: cf. REASON. Thus 'these considerations lead me' = the consideration of these facts, or these facts being considered, lead me; 'I put before you these considerations' = facts to be considered.

6. *Law.* Anything regarded as recompense or equivalent for what one does or undertakes for another's benefit; especially, in the law of contracts, 'the thing given or done by the promisee in exchange for the promise' (Langdell 1880 § 45). It may itself be a promise. No promise is enforceable without consideration, unless made by deed.

At its first appearance (see quot. 1530) it is hardly a technical term, or distinguishable from *motive*; it gradually acquired its precise technical meaning in the course of the 17-18th c. Natural affection was formerly called *good consideration*, as contrasted with *valuable c.*, or that which is deemed to have value in a pecuniary sense: the distinction is now only of historical interest.

1. An alphabetic or phonetic element other than a vowel; an elementary sound of speech which in the formation of a syllable is combined with a vowel. Applied both to the sounds and to the letters (the latter being the historically prior use).

While a vowel sound is formed in the larynx, and only receives its special quality by the conformation of the oral cavity through which it is sounded, a consonant sound is wholly or mainly produced in the mouth, or the mouth and nose. Vowels thus consist of pure voice or musical sound; consonants are either simple noises or noises combined in various degrees with voice. But a noise may itself be of a continuous and rhythmical character, as a friction, trill, hiss, or buzz, and those consonants in which this is markedly the case approach closely to vowels, and may perform the function of a vowel in a syllable. Hence 'the boundary between vowel and consonant, like that between the different kingdoms of nature, cannot be drawn with absolute definiteness, and there are sounds which may belong to either' (SWEET *Handbk. Phonetics* § 164. And there is in the consonants a regular gradation from those which come nearest to vowels and may function as vowels, to those which are most remote, and never so function. From this point of view, elementary sounds have been classed as (1) vowels, (2) semi-vowels (Eng. y and w), (3) liquids (l, r, l, r), (4) nasals (m, n, ŋ), (5) fricatives or spirants, voice (v, ð, z, ʒ, ʃ, ʒ), and breath (f, p, s, ʃ, x), (6) mutes or stops, voice (b, d, g), and breath (p, t, k). Class 2 are more strictly the vowels i, u, functioning as consonants, and classed as consonants; classes 3, 4, 5, are capable, in a decreasing measure, of functioning as vowels; only class 6 have the consonantal function exclusively, *f, t, k*, being the most typical consonants. The use of the liquids and nasals as vowels or consonants is a prominent feature in Indogermanic Phonology. (See *Vowel*.) Consonants may also be classed, according to the part of the mouth where they are formed, into labials (p, b, f, v, m, w; dentals, palatals, gutturals, and other minor groups. (See these terms.) In the Roman alphabet (with its Greek accensions; the historical vowels are *a, e, i, o, u, y*; down to the 16-17th c., *i* and *u* were used both as vowels and consonants, a double function served by *y* and *w* in various modern languages.

2. Applied to the letters (solely or chiefly).

**Consort** kɒnsɔːt, *v.* [Found first in end of 16th c. The origin and early history are obscure and complicated. It is possible that the different senses had two or even three different origins. Thus, branch I was app. formed on *CONSORT sb. 1*, with the notion of 'act as a consort to'. Branch II cannot be separated from a simple verb *Sort*, very common from c 1570 onwards in all the senses 3-6 below. In sense 3 there was obviously sometimes association with L. *sors, sortem*, F. *sort* lot, fate, destiny. Branch III is intimately associated with *CONSORT sb. 2*, branch II. But even if thus originally distinct, the senses appear to have been considered as belonging to one word, and to have mutually influenced each other, for some uses combine the different ideas: cf. 4, 5, with 1; 7 with 3, 5, 6. Cf. also *obs.* It. *consortare* 'to consort together' (Florio, 1611), f. *consorte* mate, consort. There were also med. L. vbs. *consortare*,

Other med. L. forms were *comestabilis*, *comestabilis*, etc.: see *Du Cange*. The early development of the sense, whereby the *comes stabuli*, from being the head groom of the stable, became the principal officer of the household of the Frankish kings, and of the great feudatories, and the field-marshal or commander-general of the army, had taken place before the word came into English; the development was parallel to that of *marshal*. 2. *spec. a. Constable of France:* the principal officer of the household of the early French kings, who ultimately rose to be commander-in-chief of the army in the absence of the monarch; he was the supreme judge of military offences and of questions of chivalry, and had the regulation of all matters connected with tilts, tournaments, trials by combat, etc.

The office was abolished in 1627; the title was revived by Napoleon I, but discontinued on his overthrow. An officer bearing the name of constable existed also in the households of the great feudal lords of France.

b. *Constable of England, Lord High Constable:* one of the chief functionaries in the English royal household, with duties and powers similar to those of the same officer in France.

Together with the Earl Marshal, he was the judge of the Court of Chivalry, and in early times his powers of jurisdiction were extensive. The office, which had been made merely titular a few years before, was forfeited by Edward Stafford, duke of Buckingham, in 1521; since which time the title has been granted only temporarily for particular occasions, esp. the sovereign's coronation. Thus the Duke of Wellington was Lord High Constable at the coronation of Queen Victoria.

7. The system or body of fundamental principles according to which a nation, state, or body politic is constituted and governed.

This may be embodied in successive concessions on the part of the sovereign power, implied in long accepted statutes, or established gradually by precedent, as in the British Constitution; or it may be formally set forth in a document framed and adopted on a particular occasion by the various orders or members of the commonwealth, or their representatives, as in the Constitution of the United States, the various Constitutions of France after 1790, and those of other nations, framed in imitation of these. In the case of a *written Constitution*, the name is sometimes applied to the document embodying it. In either case it is assumed or specifically provided that the constitution is more fundamental than any particular law, and contains the principles with which all legislation must be in harmony.

This sense gradually arose out of the prec. between 1689 and 1789: see the early quotes.

5. a. *Physics.* Anyspecial physical or molecular  
condition into which a body is brought by the  
operation of some force, and lasting during its  
operation, e.g. a state of tension.

which the solids are often broken, in consequence of the  
state of constraint in which the particles are held. 1881  
MAXWELL *Electr. & Magn.* I. 156 The state of constraint,  
which we call electric polarization.

b. *Dynamics.* See CONSTRAINT v. 1 e.

A body has in the most general case six degrees of free-  
dom, viz. three of translation and three of rotation; if there  
is a hindrance to one or more of these, the motion of the  
body is so far constrained; hence, *degrees of constraint*.  
Thus if one point in the body is fixed, it cannot have motion  
of translation, but has all the degrees of rotation: if two  
points are fixed, its only motion can be that of rotation  
about an axis passing through these two points; it has  
thus one degree of freedom, and five degrees of constraint:  
a sphere moving between two parallel tangent planes has  
only one degree of constraint; a cube under the same con-  
ditions has three. *Kinetic constraint*: the condition that  
a body shall move subject to certain relations: e.g. that  
a body shall roll on a plane. *Principle of least constraint*:  
the theorem enunciated by Gauss in 1829, that when there  
are connexions between parts of a system, the motion is  
such as to make the sum of the constraints a minimum.

1856 TAIT & STEELE *Dynamics of Particle Contents* (1871)  
13 Constraint by Tortuous Smooth Curve .. Constraint by  
string attached to a moving Point, etc. 1862 B. PRICE  
*Infinit. Calc.* IV. 116 Gauss' theorem of least constraint. If  
we measure constraint by the square of the distance between  
the actual place of *r* and the place which it would have if  
it were under the action of the same forces and were a  
single unconstrained particle, then the theorem is, that the  
sum of the products of each particle and its constraint is a  
minimum.

2. *adj.* in *Construct state*, *state construct*, in grammar of Hebrew and other Semitic languages: the form of the substantive used when standing before another having an attributive (or genitive) relation to it, which may be translated by the nominative (or other case) followed by *of*, as *bayyith* house, *beyth-Hohi* m house of God.

It is distinctive of the Semitic languages that in expressing such a notion as *house of God*, they do not, like the Aryan languages, put *God* in the genitive, but, retaining this unchanged, put *house* in the 'state construct'. In this form the substantive becomes accentually combined with that which follows, losing its independent stress, and undergoing various consequent changes, as loss or lightening of vowels, of inflexional consonants, etc.

**Consume**, *v.* 2 Obs. [a. F. *consume-r*, variant form of *consumer*, *consummer*, ad. L. *consummare* to CONSUMMATE; cf. CONSUMME.]

The proper F. repr. of L. *consummare* is *consummer* (14th c. in Littré), but this was often spelt after its L. original, *consummer*, and by consonant-simplification *consumer*. It was thus brought into association with L. *consumere*; the senses of the two verbs came also into contact in the notion 'finish, constructively or destructively', and during 15-16th c. both were entirely merged in the forms *consumer*, *consummer*, *consummer*. Subsequently they have been partly differentiated; but *consumer* with its derivatives *consummation*, etc. still retains the sense of 'consume victuals', which belongs etymologically to *consumer*. Cf. CONSUMPTION. In English, the confusion, which we originally received from Fr., was rectified at the Revival of Learning in the 16th c.]

**Contemplet** (*kōntēmplēt*, *kōntēmplēt*), *v.* [f. L. *contemplet*—*ppl. stem* of *contemplare*, -*ārī*: see **CONTEMPL**.]

In a few rare cases (Shaks., *Hudibras*) stressed *contem-plate* in 16-17th c.; also by Kenrick 1773, Webster 1828, among writers on pronunciation. Byron, Shelley, and Tennyson have both modes, but the orthoepists generally have *contem-plate* down to third quarter of 19th c.; since that time *contem-plate* has more and more prevailed, and *contem-plate* begins to have a flavour of age. This is the common tendency with all verbs in -ate. Of these, the antepenult stress is historical in all words in which the penult represents a short Latin syllable, as *accelerate*, *animate*, *ascinate*, *machinate*, *mitigate*, or one prosodically short or long, as in *celebrate*, *consecrate*, *emigrate*; regularly also when the penult has a vowel long in Latin, as *alienate*, *aspirate*, *concentrate*, *de-nudate*, *elaborate*, *indurate*, *personate*, *ruinate* (L. *aliōne*, *aspiro*, etc.). But where the penult has two or three consonants giving positional length, the stress has historically been on the penult, and its shift to the antepenult is recent or still in progress, as in *acervate*, *adumbrate*, *alternate*, *compensate*, *concentrate*, *condensate*, *confiscate*, *conquassate*, *constellate*, *demonstrate*, *decussate*, *desiccate*, *enervate*, *exacerbate*, *exculpate*, *illustrate*, *inculcate*, *objurgate*, etc., all familiar with penult stress to middle-aged men. The influence of the noun of action in -ation is a factor in the change; thus the analogy of *consecration*, *consecrate*, etc., suggests *demonstration*, *demonstrate*. But there being no *remonstrance* in use, *remonstrare*, supported by *remonstrance*, keeps the earlier stress.]

*Contemporary* is the original form, and that approved by Latin analogies; cf. the preceding and following words. But the variant *co-temporary* was used by some in the 17th c., and though characterized by Bentley as 'a downright barbarism', it became so prevalent after c 1725, as almost to expel *contemporary* from use. Towards the end of the 18th c., the latter rapidly recovered its ground, and *contemporary* is now used by comparatively few. It has been defended on the ground that it is a purely English formation, like *co-divine*, *co-glorious* (see *Co-* 2); but this is a mere fancy generated by mechanically dividing the word, without regard either to its history or to its meaning. Historically, *contemporary* is a substitute for *contemporal* and *contemporane* (either of which might well have been retained instead); in signification, *co-temporary* would analogically mean 'unitedly, conjointly, or equally temporary', whereas

*contemporary* has no affinity with the English sense of 'temporary', and no connexion with that word except that both are derivatives of L. *tempus* and its adj. *temporarius*.]
